# Rooster Inu

## Whitepaper

1.0

# Introduction Rooster Inu

*The original buyback token powering the Rooster Inu Ecosystem.*

*Rooster Inu, launched on January  2022, was one of the token to bring the buyback to crypto with great ecosystem dapps.  The ROOSTER token is a multi-chain, collateralized cryptocurrency that powers the Rooster Inu dApp ecosystem. The automated buyback function protects all holders by regularly purchasing ROOSTER tokens off of the open market independently of team oversight or control,*

# PROTOCOL

*Designed to protect and reward holders.*

*The Rooster Inu smart contract is built around one supply on multiple chains.*

*Holders are protected by the strategic buyback reserve, which can only purchase tokens from the market and swap the native coin to a stable-coin as a*

# ECOSYSTEM

*The Rooster Inu Ecosystem organization of Blockchain Engineers that offer a suite of decentralized applications (dApps) to provide security and payments solutions for projects and individuals in the DeFi space. Our dApps will be available on the Binance Smart Chain, Ethereum Blockchain, Fantom and the Polygon network*

# ROOSTERKEY

*This dapp help communities and projects to lock their Initial Liquidity and only can be able to unlock by act of Rating system.*

*This dapp build 100% trust between team and the community.*

# ROOSTERPAD

*Multi-chain launchpad that helps teams launch their project very smoothly and have promotion, partnership, Auto-Audit on Launch.*

*Liquidity raised here are autolock for minimium of 3 months except community vote otherwise.*

# ROOSTERSWAP

*Swap your coins across multichains as specified by on listing and it also have benefit of anti-dump to token if ticked on listing.*

*RoosterSwap will include cross chain unique benefitial features for projects and individuals.*

# ROOSTERLEND

*RoosterLend dapp allow anyone to borrow as much as 3x of their $ROOSTER token holding as loan with zero collateral or Kyc. Available to only Rooster Inu Holders.*

*RoosterLend Continues runs and provide*

# RoosterP2p

*Our RoosterP2p dapp permit swift and smooth peer-to- peer transaction through a very strict Escrow service and zero fraud system.*

*it have annonymous chat features in which admin*

# ROOSTERSTAKE

*Stake and earn Tokens Rewards with full flexibilty, you can stake and unstake at any given time and period. Stake earning percentage accumulate with time.*

*Endless earning both in staking and passive Busd.*

# ROOSTERWALLET

*We are building an advance layer of security powered wallet with fee shared among wallet users and holders of ROOSTER tokens, with additional features.*

*Rooster Attractive wallet.*

# ROOSTERMIGRATION

*One-click migration solution where users can send and receive tokens fast and securely across chains in a single transaction powered by our dapp.*

*More Update on the use!*

# ROOSTEREXCHANGE

*Advance Crypto exchanges with near to zero transaction fee and fully owned by the community of Rooster Inu Holders through DAO-like Governance Voting.*

*Transaction fees shared among Holders*

**Rooster Inu token is Hyperdeflatinary backing Rooster Inu Ecosystem and its initial total supply is calculated to be 1 Billion (1,000,000,000,000) $ROOSTER Tokens. The Token is distributed as follows.**

1. **$ROOSTER Token Burned out of existence.**

2. **locked in Pancakeswap.**

3. **Team Token**

# TAX FEE TABLE

| | | | |
|---|---|---|---|
| HOLDERS BUSD REWARD | 9% | 60% | AUTO |
| LIQUIDITY POOL | 3% | 20% | AUTO |
| TEAM | 1% | 6.7% | AUTO |
| MARKETING FEE | 2% | 13.3% | AUTO |

# ROADMAP

# LAUNCH PHASE

**Website Launch**

**Contract Deployment**

**50% Initial Token Burned**

**DEX Listing (PancakeSwap)**

**Advertising Campaigns**

**Rooster Inu Dashboard**

**1,000 Holders**

**CoinGecko Listing**

# GROWTH PHASE

**3,000 Holders**

**RoosterSwap**

**Influencer Promotions**

**Coinmarketcap**

**Listing**

**Initial CEX Listing**

**Release Reward Dashboard**

# EXPANSION PHASE

**20,000 Holders**

**RoosterPad**

**dApp Launch**

**RoosterWallet dApp Development**

**Major CEX Listings**

**Media Coverage**

**Promotions**

**RoosterKey**

# UTILITY PHASE

**Launch**

# ENHANCEMENT PHASE

**50,000 Holders**

**RoosterLend Platform**

**Development Revenue Sharing**

**RoosterStake Program Launch**

**Charity Foundation**

**Centralised Exchange Development**

# BLOCKCHAIN PHASE

**100,000 Holders**

**RoosterMigrate**

**Blockchain Development**

**Roadmap V2.0 (Relaychain, Parachain, Smart contracts etc.)**

# AUTO LIQUITY

*The Autoliquity system is design in such a way that for each buy or sell in the protocol, 3% of the transaction fee is moved out of circulation for Rooster and the liquidity added as value to the market to appreciate price action.*

*it helps to keep the price in upward*

# BURNING

*ROOSTER Token will be undergoing constant token with its intial 50% burn on Launch and more will be burned through liquidity adding system and buyback mechanism.*

*The team will also engage further in periodic manual burning of the token as the community grow in future*

# EXCHANGE LISTING

*Initial 44% of the token total supply will be listed on Pancakeswap exchange and further more, it will be listed on other decentralized smoothly and further more on centralized exchanges.*

*The more holders we harness the more exchanges we exploit and final target is to get listed on Binance exchange within 6 months.*
